**Subject:** HELP re proposed new XBRL Charity accounts taxonomy

Please can you explain this in simple language. To a charity volunteer like myself the consultation paper really does not make clear what a very small charity would be expected to do re. this (whatever 'this' is).

As a biologist I have one view of the definition of taxonomy which I am sure is incorrect in this context.

If you truly want to gather all opinions before the end of the consultation period PLEASE email a simple explanation (and one about iXBRL **and** one about Yeti). Even better confirm that none of this is intended for small charities – otherwise they will lose 95% of their treasurers, most of whom are not financial wizards, merely volunteers who are happy to give of their time.
